PAYMENT PROCESSING FOR RENTALMAN
NATIVE, OUT-OF-THE-BOX INTEGRATION

Start processing payments right away. Curbstone is fully integrated with RentalMan. Online, over the phone, and at the rental counter, you'll have everything you need to accept credit cards, debit cards, and ACH payments. By keeping payment data out of your rental software, you increase security and reduce your scope for PCI compliance reporting.

FULL SUPPORT FOR ALL RENTAL TRANSACTIONS

Rental organizations process payments in a unique way - but you don't have to change your business processes to use our software. Our payment processing module is purpose-built for rental transactions - from recurring payments to new deposits on existing contracts.

CYCLE BILLING

Update deposits and run recurring charges for your cycle bills. Whether you bill weekly, monthly, quarterly, or on a custom schedule, speed up the process of getting paid.

CARD-ON-FILE BILLING

Keep cards on file so you don't have to manually enter payment information for each new rental. Remote tokenization keeps you from storing the physical card data in RentalMan.

CASH CUSTOMERS

Quickly process payments for cash customers without having to key in the card information for each new rental.

RENTALMAN PAYMENT PROCESSING
POWERED BY

CURBSTONE

REDUCE YOUR PAYMENT PROCESSING FEES

The way you process your transactions makes a significant impact on your fees - especially when billing contractors with corporate purchasing cards. Curbstone helps you achieve the lowest possible rates through proven best practices and support for Level 2 and Level 3 transactions. You keep more of your hard-earned revenue and reduce your cost of doing business.

POWERFUL NEW SOLUTIONS FROM YOUR EXISTING TEAM

Payments can be complicated - but with integrated payments for RentalMan, you don't have to deal with a third-party software vendor. We implement and support your new technologies in-house. Questions? Our US-based, 24/7 support team will walk you through until you find an answer - whether that's from your acquirer, your bank, or your EMV terminal provider.
