

Capture Customer Signatures Anywhere

Untether your business and keep up with your customers' mobile lifestyles with e-Sign for InTempo Core.

Turbocharge Your Business with eSign

E-sign makes it easy to capture rental commitments from customers who are remote from the rental location, confirm deliveries and execute other documents. This over-the-Internet electronic signature capability is legally binding and secure, and offers end-to-end signature tracking. The executed contract is stored off-site, with copies automatically sent via email to the customer and rental store. There is no software for the customer to install, no registration process and nothing to fax or scan.

Send Link, Get Signature

InTempo Core emails a link when the customer isn't physically present at the time the contract is created. The rental operator simply creates the contract using the regular process - no extra steps are needed.

Send Terms, Items and Rates via Email

The customer can review, agree to and electronically sign the contract document using the link supplied. This can be done on an Internet-enabled mobile phone, laptop, tablet or desktop from anywhere.

Easy Experience for Your Customer

There is no software for the customer to install, no registration process or login to create, and nothing to fax or scan. The entire e-Sign process is simple, fast and easy.

MORE INFORMATION ABOUT INTEMPO CORE

InTempo Core is a flagship system for rental, sales and services businesses utilized by hundreds of businesses of all sizes. The software is designed to integrate your business operations onto a single technology platform through five main application areas: transaction processing, database maintenance, accounts receivable, security management and reporting. Core is fully customizable, easy to use and accommodates your existing account software including Quickbooks®, Peachtree®, MAS 90® and other systems.

We Are InTempo

Built on a foundation with decades of experience, InTempo delivers the right rental management software and unrivaled customer service to independent rental businesses across equipment, tool, event and specialty markets.
